

TTC Homogeneous Grating Design Induction Units

Dexia-Bank, Luxemburg

Induction units and linear comb gratings
Architect: Claude Vasconi, Paris
TGA planner: HL Technik Klaus Daniels,
Munich

Interior:

Induction units for heating/cooling/ventilation with a 4 conductor system; band-aligned, straight and curved, following the façade radius

Cover:

2,500 m aluminium linear gratings welded onto combs, 10 mm bar spacing uniform with the edge of the frame; grid height 37 mm; grid separation follows the façade grid

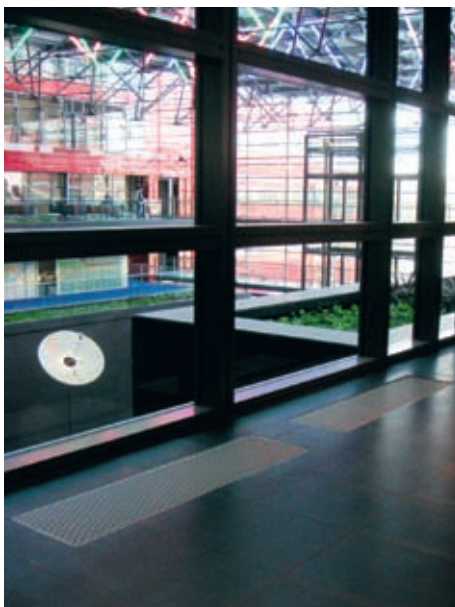

Dimensions:

Length x Depth x Height
2,800 x 380 x 170 mm

Linear gratings ▲▼

Curved or straight aluminium comb gratings
